

**EMERGENCY
REPORTING®**

The Most Trusted Fire & EMS Records Management Solution

The Maintenance Module

Easily Manage Your Station's Equipment & Apparatus

Trying to keep track of the maintenance and records of a fire truck or station equipment can be a pain if you're dealing with a lot of cumbersome paperwork and an outdated filing system.

With Emergency Reporting's **Maintenance Module**, you can easily and efficiently track the status, location and service life of all your agency's apparatus and equipment, including SCBAs and bunker gear, hose, defibrillators — even computers and portable radios.

Primary Benefits:

- Assign equipment to individual personnel, an apparatus, a station (or all three)
- Generate maintenance requests for any of your apparatus or equipment
- Track apparatus/equipment maintenance histories with ease
- Plan for equipment replacement and track equipment costs
- Customize your equipment categories to meet your department's needs
- Integrate with our industry leading Safety Analytics product
- Track PPE for NFPA1500 (See Safety Analytics)
